PROFILE INFO

With over 6 years of experience in front-end development, I have had the privilege of working across a variety of technologies, ranging from web to mobile applications. As a certified Scrum Master, I've successfully led teams, ensuring efficient project delivery through agile methodologies.

Looking ahead, my career goal is to evolve into a full-stack developer, deepening my knowledge across both front-end and back-end technologies. I am also committed to continually refining agile practices to foster better team collaboration and deliver high-quality applications more efficiently.

EXPERIENCE

2021 - PRESENT
Fortunesoft IT Innovations, Bengaluru
Senior Software Engineer

2018 - 2021
Xorstack, Bengaluru
Software Engineer

PROJECTS

ADIQAT
Milestones Technology Group, Brisbane, AU
Team Lead & React Developer

- Develop a master data management solution to centralize and manage shared data across the entire application.
- Implemented a role-based access control system with over 40 roles, allowing users to be authorized for specific modules based on assigned permissions.
- Implemented a Single Sign-On (SSO) solution using Azure Active Directory for seamless user authentication across the application.
- Integrated YellowFin as a BI dashboard for analytics and audit matrix visualization.
- Developed a multi-step provider onboarding wizard to gather comprehensive information such as services offered, business units, organizational structure, staff management, contact details, and integration specifics.
- I built a serious incident reporting system to capture incident details like priority, actions taken, people involved, and notify the concerned personnel based on the organizational structure.

EDUCATION

2014 - 2018 | PES University
Bachelor of Engineering
Computer Science Engineering

2011 - 2014 | SVIT Polytechnic
Diploma
Computer Science

CERTIFICATION

Scrum Alliance
Certified Scrum Master | CSM®
https://bcert.me/stfitwvkk

TOOLS

- VS Code / Xcode
- Prettier / ESLint / SonarLint
- MySQL Workbench
- AWS CLI
- JIRA
- Github / Bitbucket

TELEMEDICINE

Fortunesoft IT Innovations, Bengaluru

Team Lead & React Native Developer

- Established the base code with the latest React Native tech stack, incorporating updated libraries and modern development best practices.
- Implemented a theme based on the application style guide to maintain a consistent color scheme, font variants, and spacing across all shared components in the app.
- Developed a video consulting feature using Zego Cloud to facilitate virtual consultations between doctors and patients.
- Worked on an AI conversational chat system using Google Gemini and custom REST APIs to streamline appointment booking.

PRECISION TUNING

OPAL Marketing and Industry, Oman

React Native Developer

- Built an authentication feature supporting email/password, Google, and Facebook logins, along with multi-factor authentication (MFA) using OTP via Twilio.
- Developed functionality to add vehicles for tracking future service appointments, vehicle history, and other relevant information.
- Implemented a feature to find nearby service centers and book appointments directly through the application.
- Developed a notification system to send service due reminders and other vehicle-related alerts using React Native push notifications and Firebase FCM tokens.
- Implemented LTR and RTL internationalization to support both static and dynamic content, ensuring seamless language direction changes across the app.

STARLIGHT MUSIC

Starlight Music, NY, USA

React Developer

- Built an authentication feature supporting email/password, Google, and Facebook logins, along with multi-factor authentication (MFA) using OTP via Twilio.
- Developed functionality to add vehicles for tracking future service appointments, vehicle history, and other relevant information.
- Implemented a feature to find nearby service centers and book appointments directly through the application.
- Developed a notification system to send service due reminders and other vehicle-related alerts using React Native push notifications and Firebase FCM tokens.
